

# Best Silver

## **Cleanroom & ESD Socks with Silverfibre**

**Abrasion resistant, ESD safe,  
reduce perspiration,  
stop odour**

## Cleanroom- & ESD socks with 6% silverfibre

These Best4Feet® silver socks were developed especially for the use in cleanrooms. Abrasion resistant microfibre reduce the risk of contamination in a cleanroom. The usual disadvantages of conventional socks made from 100% synthetic fibre are avoided by this new generation of socks.

Thanks to the natural antimicrobial properties of 6% silverfibre, bad odour is stopped, perspiration is reduced and eczema (almost inevitable when wearing synthetic fibre socks over the whole day) are prevented.

**Bonus:** Silver is the best electric conductor. Therefore Best-4Feet® cleanroom socks are ESD safe socks too. Suitable for EPA environments.

**Best4Feet® are recommended by Health & Safety Associations.**

## Assortment / Care

Sizes S-XXL, silverwhite, 92% microfibre, 2% Elasthan, 6% silverfibre made from 99,9% pure silver.
